

Iron, Manganese & Sulphur Removal System for your Home

Whether it's the smell of sulphur or rust, stains in your sinks, your water problems can cause you more than frustration. They can discolor your laundry damage your fixtures, or create unpleasant odors in your water. Oxy Vantage™ is the solution for your serious water problems.

Until now because the cure involved harsh chemicals, the most common solution for problem water was as bad as the disease. The new solution, a proven technology, is simple and smart, using nature's own oxidation process.

Oxy Vantage™ filtration technology uses natural oxidation to remove iron and sulphur from your water supply, without chemicals, without aerators, without a venturi or without air compressors. Leaving fresh, clean water for your family to enjoy.
